STRATEGY OVERVIEW¹

The Goldman Sachs Dynamo Strategy Index™ ("GSDYNMO5"):

- o Provides exposure to components tracking equities, bonds, real estate, and commodities
- o Seeks to provide exposure to price momentum of several asset classes using a methodology developed by Goldman, Sachs & Co (Index Sponsor)
- o Combines 7 underlying components across 4 asset classes and a cash equivalent through a Money Market Position that seeks to capture the highest historical return among the universe of underlying constituents selected by the Index Sponsor's methodology, subject to constraints on maximum weights and volatility controls
- o Is rebalanced monthly and may be rebalanced as frequently as daily if the realized volatility of the Base Index exceeds the volatility cap
- o Applies two levels of volatility control across the portfolio:
 - o Target volatility: 5.0%. It is measured on a monthly basis and sets a maximum limit on the annualized historic realized volatility on each monthly rebalance date
 - o Volatility cap: 5.5%. It is measured on a daily basis. The index is rebalanced whenever the annualized historic realized volatility of the Base Index exceeds the volatility cap
- o Is calculated on an excess return basis over the sum of (i) a notional cash deposit at Fed Funds, compounded daily and (ii) a daily index cost of 0.5% per annum

REBALANCING PROCESS¹

For illustrative purposes only

- Step 1: On each monthly rebalance date, test the possible portfolio combinations of the underliers (comprised of the 7 components and the Money Market Position)
- Step 2: Consider only those portfolios that have a six month realized volatility of 5.0% or less
- Step 3: Of the remaining portfolios, choose the portfolio with the highest six month realized return. The weights of the components in this portfolio will become the weights in the Base Index
- Step 4: On a daily basis, including the monthly rebalance date, monitor the realized volatility of the Base Index over the past one month. If this volatility exceeds 5.5%, a pro-rata portion of the Base Index is allocated to the deleverage position (Money Market Position)

¹ The strategy and rebalancing process are further described in the full rulebook available at <http://www.solactive.com/downloads/GSDYNMO5.pdf>

INDEX PERFORMANCE VS. INDIVIDUAL ASSET CLASS SPECIFIC ETFs SINCE APRIL 2004²

Backtested, Hypothetical Performance; Does not reflect actual index performance

² The values of the individual asset class specific ETFs are total return, i.e. ETF dividends are reinvested. The total return versions are calculated by Solactive AG. Base Date: Jan 02 2013. Back-testing and other statistical analysis material that is provided in connection with the Index use simulated analysis and hypothetical circumstances to estimate how it may have performed prior to its actual existence. The results obtained from "back-testing" information should not be considered indicative of the actual results that might be obtained from an investment or participation in a financial instrument or transaction referencing the Index. Neither Solactive AG nor Goldman Sachs provide assurance or guarantee that the products linked to the Index will operate or would have operated in the past in a manner consistent with these materials. The hypothetical historical levels presented herein have not been verified by an independent third party, and such hypothetical historical levels have inherent limitations. Alternative simulations, techniques, modeling or assumptions might produce significantly different results and prove to be more appropriate. Actual results will vary, perhaps materially, from the simulated returns presented in this document. See the Disclaimer Language for more information on Back-testing.

DISCLAIMER LANGUAGE

The Goldman Sachs Dynamo Strategy Index (the "index") is a momentum driven strategy, aiming to capture trends in the market by using historical data over a predefined horizon (e.g. 6 months). Despite past simulations, there is no guarantee that the strategy will be able to capture trends effectively, or that the chosen horizon will still be relevant in the future.

There is no guarantee that the index will not underperform some or all of the underlying assets. In particular, the index may have a significant weight in one of those assets at the time of a sudden drop, or no exposure to one of those underlyings at a time it has a strong performance.

Different indices with a different set of underlying assets may significantly outperform the selected index.

For parts of the backtesting period, the underlying assets showed in this presentation have had strong performances. Backtested and past performance figures are not a reliable indicator or guarantee of future results.

The index is not actively managed and GS does not exercise discretion in constructing, calculating or executing the strategy. For further information and disclosure about the strategy, including relevant risk factors, please refer to the related transaction documentation.

The index was launched on June 15, 2015.
